

Storm-damaged limb over the driveway

Colm Reardon · 76 Juniper Way, Kingston, ON

JOB	VISITS	PHOTOS	PREPARED BY
JOB-1200	1	4	Sam Whitlock

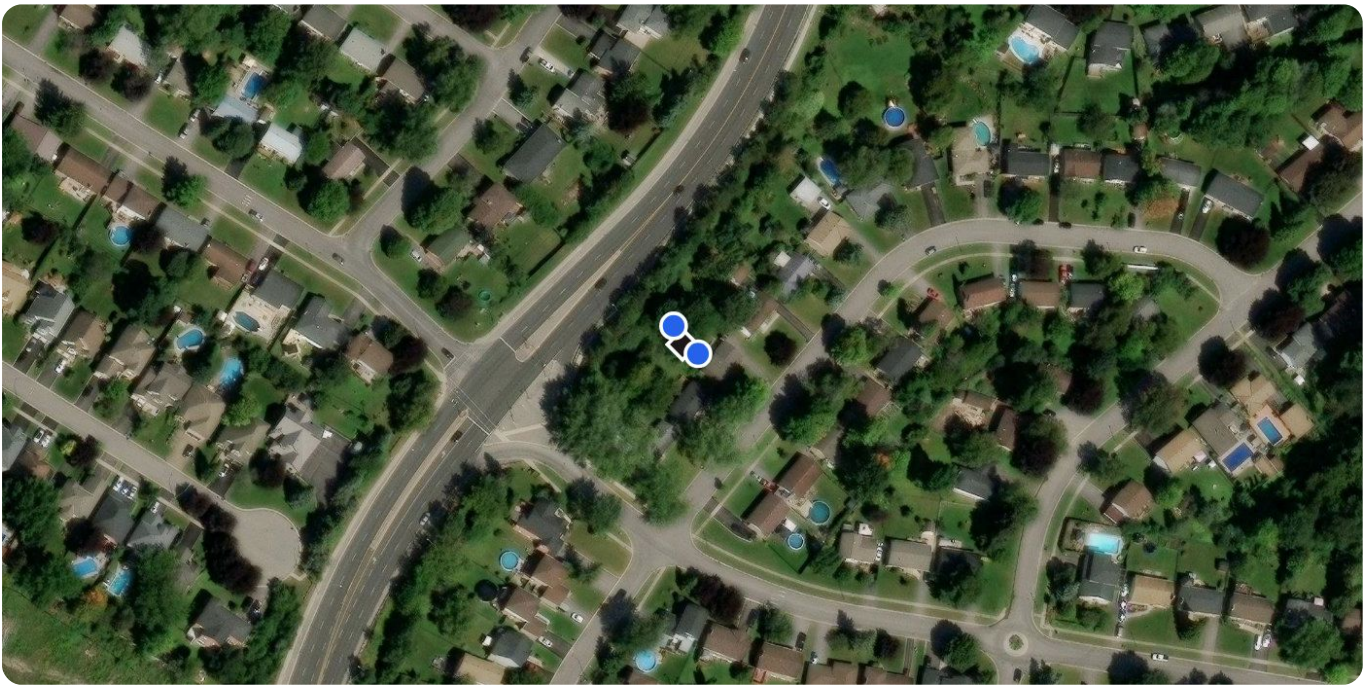

Every visit the crew recorded on this job: 1 visit on Thu, Oct 22, 2026. Times and positions come from the crew's phones at the moment they recorded each step, and each visit carries its safety check as the crew filled it in. The last page explains how. Prepared on Sun, Oct 25, 2026.

AT A GLANCE

Safety check done

1 of 1 job visit

WHERE THE CREW WAS

Aerial image. The diamond is the job; each blue dot is where a crew phone was when work started or finished (2).

Thursday, October 22, 2026

Crew: Jess Tran, Leo Martin

✓ Chip the limb and haul the wood

8:47 AM

✓ Clear and blow off the driveway

8:58 AM

How these records are made

TIMES

The crew records each visit in the CoreScape crew app on their phone. "On the way", "Started" and "Finished" are the moments they tapped On my way, Start and Complete.

POSITIONS

When the crew taps Start and Complete, the app reads the phone's location once. "±" is the accuracy the phone reported. CoreScape does not track anyone between those moments. "From the job" is the straight-line distance to the job's mapped location.

SAFETY CHECK

The crew fills in the tailboard on site before work can start: each hazard with its control, the PPE check and a sign-on by each person, with the time. Work cannot be started until it is complete. If the site changes, reopening it is logged, never erased.

WORK DONE AND NOTES

The work-done list comes from the lines of the quote the client approved; each tick carries the time it was made. Notes are what the crew entered.

PHOTOS

Photos are added by the crew through the app with the visit, marked before or after. The time on each photo is when it was added to the visit.

CHANGES

A crew member cannot change a visit after completing it. Office managers can correct a visit afterwards.

WEATHER

Daily temperature, snowfall and rain for the job's location come from Open-Meteo (open-meteo.com), a modelled historical weather service, not a reading from a nearby weather station.

AERIAL IMAGES
